## Background

Mshengu Hanson is a 100% Black owned company, originally formed in 2013. The company is proudly South African and is motivated by its intention to provide high quality service and excellence. Mshengu Hanson is led by experienced and hands-on engineers and technicians with a wide range of skills in the built and technical environment. The company prides itself of employing only the best technical resources from the built and technical environment industry to provide the best possible service for its clients.

## Vision

Mshengu Hanson's vision is to be the business technical support service provider of choice, known and respected for our ability to consistently deliver exceptional value through service excellence.

## Mission

The company's mission is to provide sustainable and appropriate technical solutions with a positive social and environmental impact, therefore ensuring value for all stakeholders.

## Culture

The company is an equal opportunity employer, committed to the development of historically disadvantaged persons to the highest level, in terms of professional training and equity in the company. The long-term objective of the company is to grow into a well-managed, resourceful technical services engineering entity, offering all services within the built environment.

All our employees are headhunted from the best within the built environment industry. This approach is motivated by the objective of providing excellent service to its clients. Furthermore, we do not believe in "one solution fits all". We tailor-make our services to meet our clients' specific and unique needs.

# Service Offering

Mshengu Hanson aims to become a partner to all our customers by devising and executing a distinctly effective offering of integrated business solutions, in a culture of integrity and excellence. We offer a multi-disciplinary array of services within the mining, petrochemical, power generation and commercial sectors.
